

Dear Parents/Guardians,

We are aware of all the challenges that you've faced over these past 6 months. We understand that your main concern is whether or not your child will be safe in school. Your General McLane nurses want you to be aware of the safety measures that we have put in place for your children. Each nurse's office has configured their office to make space for students with non-illness needs and those that present with illness. There are signs placed to direct students on where to go in the health office along with spacing signs. The District has invested in plexiglass shields, PPE and air filtration devices for the nurse's offices just to name some. Your children will be able to receive care in the safest way possible.

There is a checklist for you to review each day prior to sending your students to school. If your child has one of the symptoms on the first list, or two from the second list, then please keep them home. The nurses will call you if your child presents with any of these symptoms and needs to go home. Your child will have to be picked up and will not be able to ride the bus home if they are symptomatic. In this event, please plan to pick your child up within an hour of being notified as we have limited beds available for sick students. We appreciate your patience and understanding while we do our best to keep all students and staff healthy and safe. Please reach out to your school nurse if you have any questions. We look forward to seeing your children back in school!
