

COVID-19 Update

Oct 25, 2020

General McLane Families-

This past week, the United States reported its highest number of COVID cases in one day since the start of the Pandemic. Unfortunately, Edinboro and McKean are following the nation's trend with increasing numbers in both areas. We added an additional **ten** cases this week to our community. All cases within our School community have been quarantined as per guidelines. General McLane is confident the student cases were acquired secondary to social interactions outside of the school day.

The School District would like to remind our Lancer Families, students and parents, that any group activity that does not include consistent masking or social distancing, is a risk to our school remaining open for in-person learning. Although some businesses are allowing patrons to unmask while at restaurants, bowling alleys, and other social venues, we are seeing community spread as a result. Masking **at all times**, while indoors, is necessary to prevent COVID-19 transmission.

As always, please continue to keep your students home if they have any symptoms of illness. COVID-19 is preventable with hand hygiene, distance, and masking.

Please reach out with any questions,

Kristen Donnelly RN, BSN
